New products every quarter

The line-up grows throughout the year, with more tools for security, IT management and everyday work.

Included at no extra license charge

Eligible Endpoint Security customers get 12 months of access, with licenses matching their seat count.

How membership works

01 Purchase Endpoint Security

Any eligible term and seat count.

02 Membership activates automatically

Endpoint Security plus Xcitium Membership licenses.

03 Membership products are issued

Security, IT management and business apps.

12 MONTHS · NO ADDITIONAL LICENSE CHARGE · SAME SEAT COUNT AS YOUR ENDPOINT SECURITY PURCHASE

CYBERSECURITY & ACCESS · 12 PRODUCTS

Protect every user, site and login.

Extend your endpoint protection across the web, the network and identity.

01–06
of 27 products included

01

SECURE INTERNET GATEWAY (SIG)

Set the rules for where your team browses.

An employee takes a laptop off-site. The same web policies follow them, with reports on the sites and categories users try to reach.

Web request → Policy check → Allow or block

02

SHADOW AI

See which AI tools your teams actually use.

When a team starts using a new AI service, you see it, decide which tools or categories to allow, and review every logged request. Nothing to install.

AI request → Tool policy → Decision + log

03

SECURE ACCESS SERVICE EDGE (SASE)

Secure every site and every remote user.

Bring secure access and local threat protection together across offices and remote users, and keep traffic off a third-party security cloud.

Sites + users → Local protection → Secure access

04

ZERO TRUST NETWORK ACCESS (ZTNA)

Give each user only the apps they need.

A contractor reaches an approved app based on their role. Continuous verification applies across on-premises, cloud and SaaS applications.

Verify user → Check role → Grant access

05

IDENTITY THREAT DETECTION (ITDR)

Catch the signs of a stolen login.

If a credential is stolen or misused, suspicious sign-in activity gives your team an early signal to investigate, before it turns into a breach.

Sign-in activity → Threat signal → Investigate

06

EXTERNAL ATTACK SURFACE MANAGEMENT (EASM)

See what you expose to the internet.

Find exposed assets, open ports and public services, so your team can review possible entry points before they become incidents.

Public assets → Exposed services → Review exposure

© 2026 Xcitium, Inc. All rights reserved. All trademarks displayed on this material are the exclusive property of the respective holders.

Find the gaps. Close them.

Test your defenses, train your people and protect your data.

07–12
of 27 products included

07 VULNERABILITY ASSESSMENT

Turn external weaknesses into a fix list.

Assess your outward-facing systems, see which weaknesses were found, and use the remediation guidance to plan your next fixes.

External systems → Find weaknesses → Plan fixes

08 PHISHING SIMULATION

Find out who would click.

Xcitium designs and runs realistic phishing campaigns for your team, so you can see who is at risk and focus training where it helps.

Simulate phishing → Review response → Focus training

09 CYBERSECURITY AWARENESS EDUCATION

Build security habits in minutes.

Curated 30- and 60-minute courses, broken into short, interactive modules employees can fit into their workday.

Short modules → Interactive learning → Build habits

10 AUTHENTICATION AND SINGLE SIGN-ON

One sign-in and a clear set of roles.

Provide single sign-on and role-based access across your apps, with multi-tenancy for environments that serve distinct organizations.

Single sign-on → Role check → App access

11 PASSWORD VAULT AND SECURE NOTE SHARING

Give shared secrets an expiration date.

Host your own password vault. When you share a sensitive note or file, set it to expire after a set time or number of views.

Store or share → Set expiry → Limit access

12 BACKUP AND RECOVERY

Verify your backups before you need them.

Back up data across your network, verify it, and recover it when a file is lost or a system needs to be restored.

Back up → Verify → Recover

IT MANAGEMENT · 6 PRODUCTS

Run IT from one place.

Service desk, assets, alerts and knowledge for the team keeping everything running.

13–18
of 27 products included

13

ADVANCED REPORTING

Show leadership what security is delivering.

Share dashboards and reports that turn security activity into results your leadership team or clients can review.

Security activity → Dashboards → Share results

14

IT SERVICE AND ASSET MANAGEMENT

See the asset behind the ticket.

Handle requests, incidents and changes alongside your IT asset register (CMDB), so teams see what they're supporting in one place.

Service request → Asset context → Manage change

15

HELPDESK AND TICKETING

Give support one inbox to work from.

Bring email and other support channels into a shared inbox, so your team picks up the full conversation and responds from one place.

Customer channels → Shared inbox → Team response

16

NOC / ALERT AGGREGATION

Bring scattered alerts into one NOC view.

Centralize alerts from Xcitium and third-party tools, so your operations team sees what needs attention without switching consoles.

Multiple tools → Single NOC view → Review alerts

17

WARRANTY AND ASSET LIFECYCLE

See which devices are nearing warranty expiry.

Track device warranty status and lifecycle across your managed client assets to inform replacement planning.

Device inventory → Warranty status → Plan refresh

18

KNOWLEDGE MANAGEMENT

A place to find the latest answer.

Create and co-edit runbooks and internal knowledge, make it searchable and control who can access it, in the cloud or on your own servers.

Create knowledge → Control access → Find answers

© 2026 Xcitium, Inc. All rights reserved. All trademarks displayed on this material are the exclusive property of the respective holders.

BUSINESS APPLICATIONS · 9 PRODUCTS

Run the business, too.

The everyday tools your whole company works in, included with the same membership.

19–24
of 27 products included

19 SECURE MESSAGING AND COLLABORATION

Keep team conversations on infrastructure you control.

Bring chat, calls and screen sharing into one workspace, with the option to host it yourself so no third party has access.

Chat + Calls + Screen sharing

20 INTRANET AND COMMUNITY

One place to share what's happening.

Use profiles and group spaces to help departments share updates, collaborate and keep company knowledge accessible.

Profiles + Group spaces + Shared knowledge

21 WORKFLOW AUTOMATION

Automate the steps your team repeats.

Turn a process like onboarding into a checklist, with triggers that run routine actions automatically.

Trigger → Checklist → Automated action

22 PROJECT MANAGEMENT

See what's moving and what's stuck.

Plan work, track tasks and goals, and log time in one place, so your team can review progress together.

Plan work → Track tasks → Review progress

23 TIME TRACKING

See where your team's time goes.

Record time and tag it by client, project or type of work, then review it in lists, calendar views and dashboards.

Log time → Tag entries → Review patterns

24 ERP AND CRM

Run sales and operations in one system.

Bring sales, billing, inventory and projects together, so teams work from the same system from sale to delivery.

Sales + Billing + stock + Projects

© 2026 Xcitium, Inc. All rights reserved. All trademarks displayed on this material are the exclusive property of the respective holders.

Bill it. Measure it. Ask it.

Invoicing, analytics and surveys round out the line-up.

25–27
of 27 products included

25

INVOICING AND ACCOUNTING

Go from quote to payment in one place.

Send quotes and invoices, take payments, and track expenses and cash flow in the same workspace.

Send quote → Issue invoice → Take payment

26

WEB AND PRODUCT ANALYTICS

See what turns visits into conversions.

Understand where visitors come from, what they do and whether they convert, without using cookies.

Traffic sources → Visitor behavior → Conversions

27

ONLINE SURVEYS

Get answers from customers and employees.

Create and run online surveys using the hosted service, or deploy them on your own servers.

Create survey → Choose hosting → Collect responses

Your membership keeps growing.

New products are added to PoV Membership every quarter, bringing more tools for security, IT management and everyday work.

12 months
Membership licenses run for the first 12 months.

25+ products
Issued automatically. Nothing extra to order.

Matching seats
Licenses match your Endpoint Security seat count.

No auto-renewal
Licenses expire after 12 months unless you renew.

Put your membership to work.

Ask your Xcitium account manager to review your included products and help you pick the ones that solve an immediate need.
